PROJECTS

Luminum Landing-Page | Html, Tailwind CSS, React, Vite, Css, JavaScript

Mar- 2024

- Developed a Front-End page
- This website functions properly on phones, iPads, and large screens.
- You'll enjoy an amazing experience on any device because it has been custom-tailored to suit flawlessly on all these varied screens.
- HTML, CSS, JavaScript, React, and Tailwind are used to develop Luminum landing pages.
- This was my contribution in the landing page design for the company Luminum.

Signature - Web | Html, CSS, JavaScript, Bootstrap

Apr – 2024

- You can draw your signature on any background color and draw with any color, then save it by clicking the save & download button. If you recently re-uploaded the site but saved your image, you can get it by clicking the re-upload signature button.
- You can also choose your preferred font size.
